

Date stamp without height adjustment (Ø5 to Ø12mm)

mountable from the mould parting surface

...particularly suitable for thin-walled parts and low-viscosity media (e.g. rubber, etc.)

Description / Dimension table

- Complete stamp and insert from moulded side changeable
- O-rings temperature resistant to 200°C
- Thread for fastening in the mould
- Engraving mirrored, recessed

Dimension table in mm (*Ø3 and Ø4mm on page 31)

D	3*	4*	5	6	8	10	12

SW	2	3	2	2	3	3	4

material: 1.4034, hardened

Fixing and adjustment

- Mount the sleeve from the mould side using a hexagon socket wrench.
- Insert the insert by turning clockwise and anti-clockwise under slight pressure and set the desired position.
- If the insert is blocked, turn approx. 3 turns to the left. The insert lifts. Then turn the insert approx. 90° to the right and then press it back into the mold. The insert sits flush and the adjustment range is established.

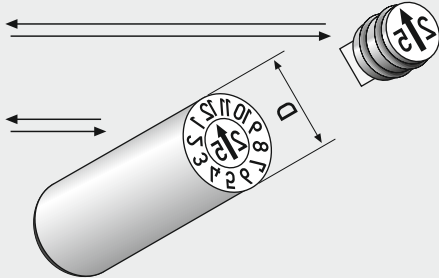

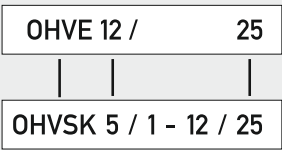

Change

- Turn the insert clockwise as far as it will go, then turn the insert anti-clockwise until the insert can be removed.
- Insert the new insert by turning it clockwise and anti-clockwise while applying slight pressure.

Order key and example

- complete with hexagon (OHVSK)
- or only insert (OHVE)
- sleeve diameter (e.g.: D = Ø5)
- engraving of the sleeve (e.g.: 1-12)
- engraving of the insert (e.g.: 2025)
